

IMPORTANT NOTICE

2024 SPRING WATERMAIN MAINTENANCE

Routine system maintenance, including flushing, is due to commence in your area. The dates for flushing in the various areas are shown below:

Cainsville	April 15 to May 3, 2024
Paris	April 22 to June 3, 2024
St. George	April 22 to May 31, 2024

During the flushing process, there should be no interruptions to water service. Common and temporary effects of the flushing process could include a slight drop in water pressure and/or cloudy-discoloured water.

Upon completion consumers should open a cold water tap for a few minutes until the water appears clear.

If the water does not clear or if water pressure does not return, please contact the Environmental Services – Water Division at 519.442.7268

Thank you for your patience during our maintenance program.
